

## MANIFESTO

Amadea Topalli running for TLSU Secretary

### About Me

Hi! I am Amadea. I am in my fourth year here at Trinity Laban on the BMus performance course, studying saxophone! I enjoy all styles of music; I also play the clarinet and love to sing every once in a while. Fun fact if you didn't already know, I am from Albania and enjoy exploring my culture in any way I can. I have been the interim secretary since August and I am hoping, with your vote, that I can stay in this role!

### My GOALS

Societies - I would really love to try and expand our societies and , as well as making this a key part of the student experience. I also hope to build the connection between TLSU and societies further - and one of my main goals is to go to the sessions and get involved!

Communication - I am aware that communication between TLSU and the student body is something that, previously, has been doubted. One of my goals is to build this and bridge the gap and prioritise communication with the students. Responding to emails as quickly and informatively as I can, and creating a system that means all emails receive a response.

Lockers - To continue working closely with students on our new locker system and ensuring that these are allocated fairly and that students are heard in their requests. This is something I have been overseeing thus far and would love to continue working on this.

### My PROMISES

I promise to continue acting on everything I have been working on with the team so far.

I promise to always listen and prioritise the student voice.

I promise to do my best to help everyone get a locker if they want one!

I promise to help the societies achieve their full potential.

### What are my assets?

I am confident in communicating with all types of people, and am trained in working with a large variety, so this will help on the admin side of the job when responding to emails and communicating with students.

I am passionate and have a real drive about being a part of the SU, to want to help everyone whilst studying here. I believe this is an important factor of being part of the team.

I survived freshers!
